Subject: Microsoft Settlement

To Whom it May Concern:

You call this a settlement? I simply don't agree that it even comes close!

It is difficult for me to believe that what has been purported as a settlement is anything other than a sham as it fails to address the monumental multiple problems created by Microsoft's antics in the marketplace they dominate because of their unfair practices.

Microsoft has stepped on every person who operates a computer system, from the smallest to the largest, and has deliberately hurt small business concerns in an effort to get rid of them!

Respectfully,
